**NEW OLIVERI PROFESSIONAL SERIES SINKS
COMBINE CRISP DESIGN AND HEAVY-DUTY CAPACITY**

Corona, Calif. -- Oliveri Sinks is introducing a new line of professional-grade, large-capacity sinkware.

The 1100 series features heavy-duty, 16-gauge stainless steel and is fabricated with tight radius corners of 10 millimeters, which creates a clean, sharp design and makes it easy to clean.

The minimalist look and large capacity basins of the new 1100 series are ideal for high-end and professional kitchens.

Oliveri's 1100 series offers four basin sizes. The top size has a 23.4-gallon capacity to accommodate the largest cooking pots, pans and trays. All configurations of the basins come with Softtone® undercoated soundproofing and include a basin protector and a drain basket.

Tasman Sinkware, the Australian-based manufacturer of Oliveri brand sinks, has produced high-quality stainless steel sinks for both the domestic and export markets for 60 years. Innovators in design and technology, Tasman Sinkware has created a new line of Oliveri sinks for the North American market that complements its extensive European-design product offering.
